

Please do not legally mandate a system that requires citizens to carry GPS locating devices in order to use a VoIP telephone. Safety is important, as is 911 access. If you must legally mandate 911 access by non-wired telephones and the only way to accomplish that is with GPS devices, pls seriously consider having the GPS broadcast its location if, and ONLY IF, 911 is dialed. This would accomplish your goal of 911 locating as well as satisfying our privacy concerns. Thanks for your time.
